Skills

Programming Languages

C#, SQL, JavaScript

Engines & Tools

Unreal Engine 5, Unity, Phaser 3, Blueprints, Blender, Git

Game Development

Gameplay Programming, Game Systems, Debugging, Procedural Generation, Version Control, Team Collaboration

Languages

English (Intermediate)

Spanish (Native)

Game Developer focused on gameplay programming and game systems. Experienced in developing gameplay mechanics, interactive systems, game logic, debugging, and optimization using Unity, Unreal Engine 5, and Phaser. I have worked both independently and within multidisciplinary teams on 2D and 3D game projects. Currently pursuing a Bachelor's Degree in Video Game Production and Digital Entertainment at Universidad Nacional de Rafaela, while holding a University Technician degree in Video Game Development and Interactive Narrative.

Projects

GOL RUSH – Unreal Engine 5

- Sole programmer for a 3D arcade game developed in Unreal Engine 5.
- Implemented player controls, ball physics, scoring, match logic, win conditions, UI, and sound systems.
- Worked in a two-person development team, taking responsibility for the project's programming.

OUT-VOID – Unity / C# – In Development

- Programmer and Game Designer for an FPS Roguelike developed in Unity.
- Developing gameplay, combat, enemy, and procedural generation systems.
- Collaborating in a three-person team using Git for version control.

Education

Universidad Nacional de Rafaela (UNRaf)

Bachelor's Degree in Video Game Production and Digital Entertainment
